

Trauma Registry Services

Trauma data management solutions to improve quality and compliance

Trauma registries have played a significant role in the substantial decline in death and disability rates from injuries. A strong trauma registry is vital to ensuring continued improvements in the care of trauma patients.

Whether you are facing an abstracting backlog or having trouble finding qualified registry staff, Ciox Trauma Registry Services can help maintain the timeliness, accuracy, and compliance of your registry.

Our team of trauma registry specialists – led by a Certified Specialist in Trauma Registries (CSTR) with more than 20 years of experience – has experience in both Commission on Trauma (CoT) and state-accredited facilities.

Additionally, our account managers work collaboratively with our clients to ensure quality and the highest level of service delivery.

The Ciox Advantage

- Customized solutions ranging from staff augmentation to full, comprehensive registry outsourcing
- Accurate, timely management of trauma data collection, coding, and verification
- Experience in trauma program accreditation with the American College of Surgeons CoT
- Solutions that improve timeliness of reporting and accreditation compliance
- Consistency in staffing that reduces expenses and unpredictable outcomes

Trauma Registry Services

Ciox offers comprehensive services to address the full spectrum of trauma registry needs.

Data Collection

- Abstraction of required data elements
