WELCOME TO OUR CODING ROUND TABLE WEBINAR 150
3rd Quarter Selective Coding Clinic Review

Every Record Represents a Real Person

Ciox has developed provider-focused solutions that improve patient and organizational outcomes through better health information management. Our integrated approach – people + processes + technology – can help your organization enhance operations, optimize revenue, and improve patient outcomes.

- ✓ Managed Coding (Facility and Professional Fee)
- ✓ Coding Quality Review
- ✓ Denials Management
- ✓ Clinical Documentation Quality Improvement (CDQI)
- ✓ HIM Consulting

Why Ciox?

- Embedded personnel at **2,200+** hospitals and health systems and **15,000+** clinics
- **3 out of 4 top 100** U.S. hospitals served
- **40** years of health information management experience
- **7,000+** HIM professionals and record release experts
- **99.99%** PHI disclosure accuracy rate
- **98%** coding accuracy
- **120+** health plans served
- **50M+** health information requests fulfilled annually

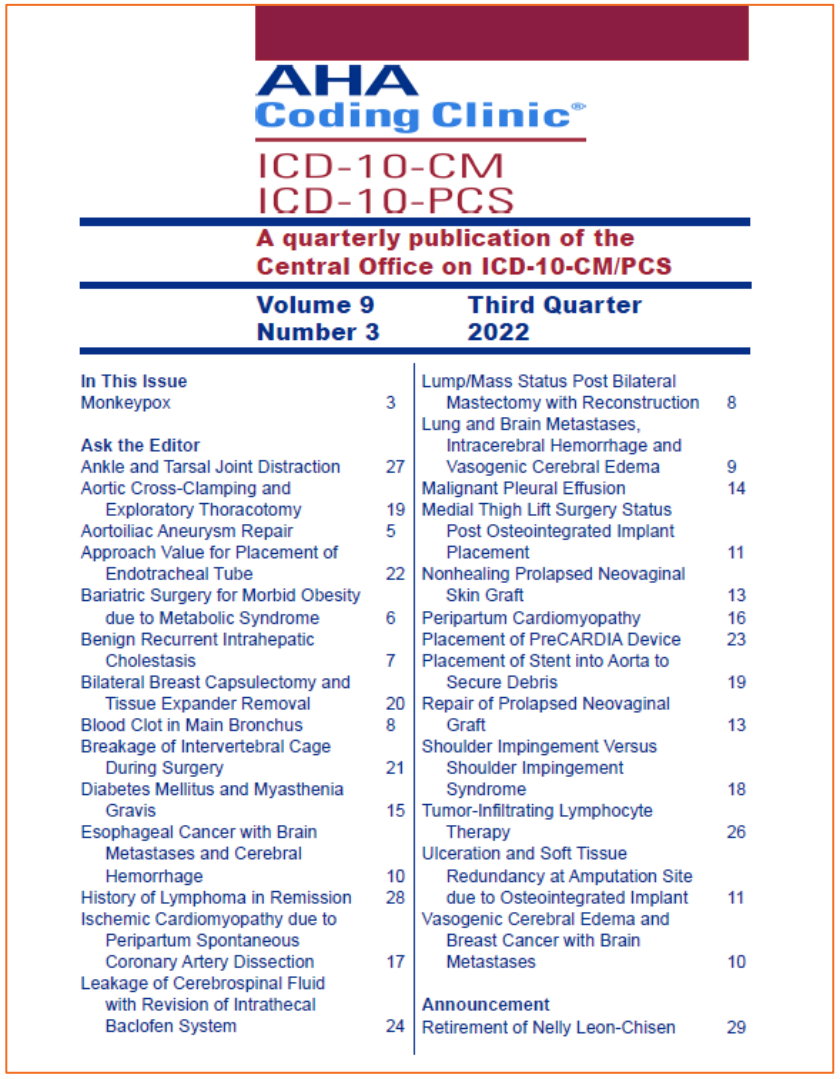
Empowering Greater Health

Round Table 150 IP Topic: 3rd Quarter Selective Coding Clinic Review

Presented by: Scot Nemchik CCS CRC CLSSS

CONFIDENTIAL: Do not distribute copy or print, in whole or in part, without permission of Ciox Health

Agenda



AHA Coding Clinic®

ICD-10-CM
ICD-10-PCS

A quarterly publication of the Central Office on ICD-10-CM/PCS

Volume 9 Number 3 — Third Quarter 2022

In This Issue

Monkeypox 3

Ask the Editor
Ankle and Tarsal Joint Distraction 27
Aortic Cross-Clamping and Exploratory Thoracotomy 19
Aortoiliac Aneurysm Repair 5
Approach Value for Placement of Endotracheal Tube 22
Bariatric Surgery for Morbid Obesity due to Metabolic Syndrome 6
Benign Recurrent Intrahepatic Cholestasis 7
Bilateral Breast Capsulectomy and Tissue Expander Removal 20
Blood Clot in Main Bronchus 8
Breakage of Intervertebral Cage During Surgery 21
Diabetes Mellitus and Myasthenia Gravis 15
Esophageal Cancer with Brain Metastases and Cerebral Hemorrhage 10
History of Lymphoma in Remission 28
Ischemic Cardiomyopathy due to Peripartum Spontaneous Coronary Artery Dissection 17
Leakage of Cerebrospinal Fluid with Revision of Intrathecal Baclofen System 24
Lump/Mass Status Post Bilateral Mastectomy with Reconstruction 8
Lung and Brain Metastases, Intracerebral Hemorrhage and Vasogenic Cerebral Edema 9
Malignant Pleural Effusion 14
Medial Thigh Lift Surgery Status Post Osteointegrated Implant Placement 11
Nonhealing Prolapsed Neovaginal Skin Graft 13
Peripartum Cardiomyopathy 16
Placement of PreCARDIA Device 23
Placement of Stent into Aorta to Secure Debris 19
Repair of Prolapsed Neovaginal Graft 13
Shoulder Impingement Versus Shoulder Impingement Syndrome 18
Tumor-Infiltrating Lymphocyte Therapy 26
Ulceration and Soft Tissue Redundancy at Amputation Site due to Osteointegrated Implant 11
Vasogenic Cerebral Edema and Breast Cancer with Brain Metastases 10

Announcement
Retirement of Nelly Leon-Chisen 29

1. Diagnosis Sequencing: Complications Associated with Neoplasms
2. Malignant Pleural Effusion
3. Aortic Aneurysm Procedures
4. Diabetes Mellitus and ‘Myasthenia’
5. Diagnosis Sequencing: Post-Partum Cardiac Conditions
6. Lymphoma in Remission with/without “NED”
7. Monkeypox Coding
8. Other Fun Stuff!

Diagnosis Sequencing: Complications Associated with Neoplasms

I.C.2.L4

Encounter for complication associated with a neoplasm

When an encounter is for management of a complication associated with a neoplasm, such as dehydration, **and the treatment is only for the complication**, the complication is coded first, followed by the appropriate code(s) for the neoplasm.

The exception to this guideline is anemia. When the admission/encounter is for management of an anemia associated with the malignancy, and the treatment is only for anemia, the appropriate code for the malignancy is sequenced as the principal or first-listed diagnosis followed by code D63.0, Anemia in neoplastic disease.

CONFIDENTIAL: Do not distribute copy or print, in whole or in part, without permission of Ciox Health

Malignant Pleural Effusion

J91 Pleural effusion in conditions classified elsewhere

Excludes2: pleural effusion in heart failure (I50.-)
pleural effusion in systemic lupus erythematosus (M32.13)

J91.0 Malignant pleural effusion

Code first underlying neoplasm

J91.8 Pleural effusion in other conditions classified elsewhere

Code first underlying disease, such as:
filariasis (B74.0-B74.9)
influenza (J09.X2, J10.1, J11.1)
