

AudaPro

Why You Need It

Managing payer audits is a challenging process that can strain resources and lead to lost revenue:

- Missed Deadlines: Timely filing issues lead to denials and appeals opportunities are no longer available
- Workflow Friction: Spreadsheet management and siloed processes lead to poor cross-team collaboration and extra labor
- Dollars at Risk: Improperly managed audits equate to payers rejecting claims, or recouping past payments

What You Get

AudaPro provides *faster, easier, and better* audit tracking and workflow management.

Faster

Audits can be created quickly using automated data entry from claim and remit data. Integrated with Ciox's leading ROI technology and services for faster record release

Easier

All teams managing audits can see where each audit is in the process and provide updates, documentation, comments with just a click

Better

All audit related content is tracked in a single centralized AudaPro instance, offering a single source of truth for tracking, documents, and financial data

An Integrated Solution

AudaPro is directly integrated with Ciox's release of information (ROI) solution to decrease effort and accelerate chart retrieval turnaround time.

Ciox is a certified Health Information Handler and can transmit medical records as well as first and second level appeal documentation to CMS review contractors using esMD. Additionally, Ciox can receive ADR letters electronically for RAC, MAC, SMRC and any other contractors that participate in the eMDR process and automatically input these audit requests into the AudaPro tool.
